

Fleet management

Outsourcing and cost optimisation

Overview of things worth knowing

Fleet leasing is a first step towards cost variabilisation and reduction. With fleet management, our specialists take over the financing and management of your vehicle fleet according to individually selected service modules in a modular system - an outsourcing option that many successful companies are already using for themselves.

Your requirements

- You want to outsource the management of your vehicle fleet.
- You want to reduce your operating costs.
- You want to focus on your core competencies.

Your benefits

- Professional cost and risk management by our specialists reduces your operating costs, disburdens your administration and supports you in your choice of vehicles.
- More efficiency, transparency and optimised communication when purchasing company vehicles.

Fleet management conditions

- Minimum fleet size: 5 vehicles or more
- Companies and organisations with domicile in Switzerland
- Only legal entities
